EXPERIMENT

Title

MISSING ALPHABETS

Description

Pangram is a sentence containing every letter in the English alphabet. Given a string, find all characters that are missing from the string, i.e., the characters that can make the string a Pangram. We need to print output in alphabetic order.

For example,

Input: welcome to geeksforgeeks

Output: abdhijnpuvxyz

Source Code:

```
def missing_characters_to_program(input_string):  
    alphabet=set('abcdefghijklmnopqrstuvwxyz')  
  
    input_chars=set(input_string.lower())  
  
    missing_chars=alphabet - input_chars  
  
    stored_missing_chars=sorted(missing_chars)  
  
    return ".join(sorted_missing_chars)"  
  
input_string=input()  
result=missing_characters_to_program(input_string)  
print(result)
```
